Continuation Sheet (PTOL-303) 009/846,899

178

Application No.

Continuation of 2. NOTE: Proposed amended claim 1 contains the new issue "..in which the cement production process produces cement as a product and clinker at the kiln output as an intermediate" which would require both further consideration and search. The Examiner acknowledges the Applicant's explanation as to why the Applicant did not present arguments with respect to the Hansen et al. and Taulbee references however the Examiner is not aware of anything in the MPEP that allows an applicant to be silent with respect to references used as applied prior art and to not be therefore compliant with respect to 37 C.F.R. 1.111 for the reason stated on page 13 of the reply.

Continuation of 10. Other: The drawings as shown in paragraph 8 above were disapproved because most of Figure 2 has a solid black background and the vast majority of the lettering in the figure cannot be read lacking clarity. Similarly, Figure 3C has a solid black background in the graph and what the graph is showing lacks clarity in the lines of what is being graphed here.
